

THE MEADOWS

DUPLEX INSULATION

- 5/8" FireX Gypsum for sound and fire protection between unit walls and on ceilings.
- 5 1/2" Fiber Mineral Sound Insulation (FMSI) FMSI is denser than standard thermal fiberglass insulation and is preferred in use of wall and ceiling construction for reducing sound transmission.
- 1" air space helps stop sound from transferring through the wood.
- R-49 Blown in insulation in the ceiling.

See insulation diagram:
